

# Carbon Emissions Summary

## Total emissions

\*Tonnes of carbon dioxide equivalent

5,606

tCO2e\*

## Emissions intensity

\* Based on net revenue

0.0493322

kgCO2e/AUD\$\*

## Emissions by scope

### Scope 1

#### Direct emissions

Emissions released directly from company operations, such as burning natural gas for heating or fuel for transportation.

544

tCO2e

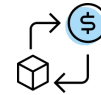

### Scope 2

#### Indirect emissions from purchased energy

Emissions related to purchased electricity, steam, heating, and cooling.

396

tCO2e

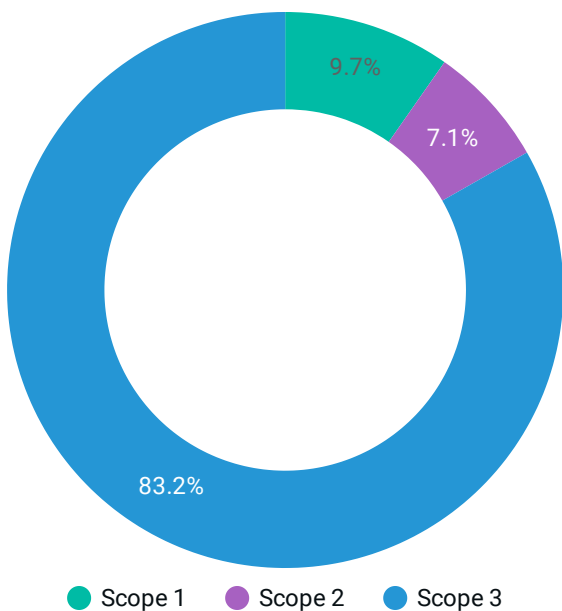

### Scope 3

#### Supply chain/value chain emissions

Emissions from your value chain, covering everything from raw material acquisition to the treatment of sold products after use.

4,666

tCO2e

## Top categories

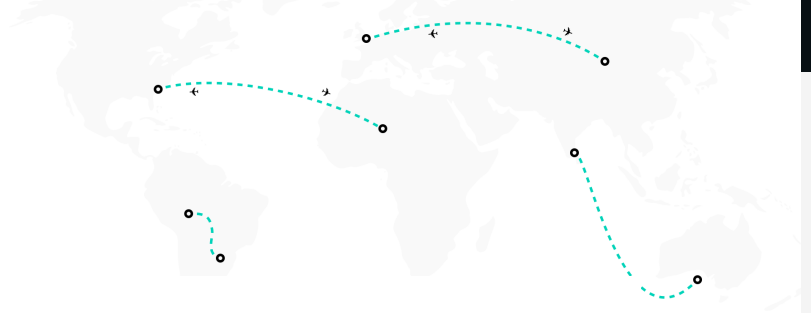

tCO2e ▾

Purchased goods and services	3,011
Employee commuting	976
Stationary combustion	498
Purchased electricity	396
Waste generated in operations	232
Capital goods	227
Fuel and energy-related activities	146
Upstream transportation and distribution	50
Mobile combustion	46
Business travel	21

## Scope 3 breakdown

Emissions from your supply chain, covering everything from raw material acquisition to the treatment of sold products after use.

All totals are tonnes of carbon dioxide equivalent (tCO2e)
